Checkpoint 4 Sprint D 04-06-2021

Built binaries but Jan Willem couldn't get them to run :/

Did a good job on building the binaries for the client with limited time as he was constrained by others' work having to be finished beforehand.

Dave did the binaries for the client, he ran into some problem during making it because we had 2 files and it was running into problems. He managed to do it and did a great job.

Very communicative and with good initiative

Good work on binaries.

Checkpoint 3 Sprint C 13-05-2021

Got the work done

good job on ci/cd.

David took care of the sonarqube and ci-cd. He did a nice job.

Had a lot of small but essential tasks during this sprint and executed them in time and without a problem.

Completed all tasks on time. Good documentation.

As always informed us whenever we missed something and came up with new ideas. Good initiative and communication

Checkpoint 2
Sprint B
13-04-2021

Got the work done and did decent during the sprint 2 demo

good job on lead the project.

helped me a lot with the license plate part

Did great as a Scrum Master - very organized. Awesome job on the license plate recognition system with Florin.

Completed responsibilities given. Good teammate. Good scrum master.

David was the scrum master this sprint. He did excellently as the scrum master. Also made the license plate recognition work together with Florin. He is one of the best in communicating within the gro... [Read more](#)

Checkpoint 1
Checkpoint 1
26-03-2021

Got the work done, always on-time.

David researched about plate number recognition and did a great job

Completes his work properly and in time. Great at researching new technologies. Needs to voice his opinion more.

He is a technical expert in my opinion. For some difficult issue, he could take over it.

Worked with me quite a bit, clear explanations and active

Completed responsibilities given. No complaints, good research.
